Summary

Senior Technical Writer with 9+ years of experience delivering API, SaaS, and cloud documentation in Agile environments. Proven ability to translate complex technical concepts into clear, user-focused content for developers and end users. Experienced in creating and maintaining documentation using VS Code, GitHub Copilot, multiple LLM models, and MadCap Flare. Strong background in cross-functional collaboration, AI-assisted documentation workflows, content standardization, and improving documentation quality and consistency. Portfolio available showcasing API documentation and writing samples.

Experience

Senior Technical Writer – Ness Slovakia (2018 – Present)

- Create and maintain API and SaaS documentation using Markdown (VS Code) and MadCap Flare, including installation, implementer, user, and solution guides, as well as feature documentation and release-related content.
- Leverage AI tools (GitHub Copilot, ChatGPT) to create and refine documentation, develop new content and documentation styles, standardize structure and terminology, and improve overall documentation workflows and efficiency.
- Collaborate with engineering, product, and subject matter experts to define documentation requirements, validate technical accuracy, and align content with product changes.
- Develop documentation frameworks, templates, and content standards to improve consistency, usability, and maintainability across documentation.

Technical Writer – IPSoft Slovakia (2015 – 2018)

- Managed Zendesk knowledge base content and developed custom Zendesk App Builder applications to streamline knowledge base management workflows.
- Created customer-facing help center content, notifications, and product tours in Intercom to support user onboarding and product adoption.
- Used Git-based workflows and Markdown for version-controlled documentation.

- Created API documentation, user guides, and process documentation for enterprise systems.
- Designed and implemented documentation processes for international customers.

Head of Team – T-Systems Slovakia (2010 – 2015)

- Managed team operations, customer communication, and service delivery processes, ensuring effective coordination, issue resolution, and consistent service quality.
- Led process improvements across monitoring and infrastructure projects, helping streamline workflows, improve operational efficiency, and support reliable service delivery.

Skills

Documentation & Publishing

- **MadCap Flare (Advanced)** – Creating and publishing structured HTML documentation and user guides.
- **Markdown / HTML (Advanced)** – Writing structured, maintainable documentation content.
- **VSCode (Advanced)** – Authoring and managing documentation in Markdown-based workflows.

Version Control & Workflow

- **GitHub / GitLab (Advanced)** – Managing documentation using Git-based workflows and version control.
- **Documentation-as-Code** – Maintaining structured documentation in collaborative environments.

Knowledge Base & Support Content

- **Zendesk (Advanced)** – Managing and maintaining knowledge base content.
- **Intercom (Advanced)** – Creating and structuring customer-facing help center content.

AI-Assisted Documentation

- **GitHub Copilot (Advanced)** – AI-assisted content creation and documentation drafting within development workflows.
- **ChatGPT (Advanced)** – Supporting documentation workflows, content structuring, and editing.

Multimedia & Training Content

- **Camtasia (Advanced)** – Creating video tutorials and training materials for documentation.
